

Reformed Hamifesto

We need *people!* We need *people!*
We need *people* to make people;
We need people-making people;
We need people making *more*:
There's an ageing population
And net zero immigration -
And the older generation are much...
older than before.

We need engineers and labourers – and people going spare:
People for the people needing residential care.
We need nurses in our hospitals
And teachers in Our schools;
We need pupils in the classroom –
Politicians making *rules*;

We need people in the factories and people in the fields;
People to increase the size of people-making yields;
We need people making people who are born in the UK:
Decent *British* citizens, who'll work for basic pay.

Two-point-one per family – we've gotta keep it real!
The one percent needs lots of little cogs to turn the wheel -
We don't need any ...*poets* - or *creatives* making 'Art' –
We've got *AI* to do that shit - and *AI's jolly Smart!**

*Yet, *AI* can't make people; we urge you to take heed:
We need to make more people –
So *You People* need to breed!

We need people in our surgeries
And people in our stores;
People for emergencies –
And people fighting wars;
We need people keeping order;
We need people stopping boats -
We need people on The Border:
We need people sowing oats.

We want fertile, working people:
We need mothers, we need dads;
We want handmaids; we want surrogates
And lads with perfect 'nads
DO IT for your Country! Join the Birth Campaign!
Patriots, Republicans – Make Britain Great Again!

We rich will all get richer – so let's keep each other sweet:
Cheap private education for the privileged elite!
We need people building houses people can't afford to buy
While Landlords, bankers, billionaires spend winters in Dubai.

Single over-40s;
And chair-bound OAPs –
If we just got rid of *that* lot
We could live a life of ease.
Make Muslims, Hindus, Sikhs and Jews convert to C of E –
They'll chorus "*Rule Britannia*" every evening on *GB!*
We'd like more '*English*' people -
And we've got no time for gays...
 "*We'd best redact that statement*",
 Our chief advisor says.

We don't need dreary people who are always asking "*Why?*"
We need people making people when demand exceeds supply;
We need economic units;
We need humans as resources;
(And a troupe of youthful eunuchs
Might be useful in The Forces!);
Women – join the cause – and do us all a massive favour
Big ironic pregnant pause –
 then *one last push* for' labour'...

If people don't make people
Who'll be here to wipe our arses?
Who will meet the needs of the entitled upper classes?
Raise the pension age to eighty!
For the State, we'll live and die
We need people to make people -

So, go forth and multiply!
